3.1	Добавление информации о навыках, об опыте и о достижениях. . .	7
3.2	Язык разметки Markdown. . . . .	8
3.3	Пост по прошедшей неделе. . . . .	9

## **Список таблиц**

# 1 Цель работы

При выполнении данного этапа моя цель добавить информацию о навыках (Skills), добавить информацию об опыте (Experience), добавить информацию о достижениях (Accomplishments) и сделать пост по прошедшей неделе и язык разметки Markdown.

## 2 Задание

Добавить информацию о навыках (Skills). Добавить информацию об опыте (Experience). Добавить информацию о достижениях (Accomplishments). Сделать пост по прошедшей неделе. Добавить пост на Язык разметки Markdown.

## 3 Выполнение лабораторной работы

Для начала я открыла файл `work/blog/content/admin` и расписала свои навыки, опыт и достижения.(рис. 3.1).

```
# Skills
# Add your own SVG icons to 'assets/media/icons/'
skills:
  - name: Technical Skills
    items:
      - name: Python
        description: ''
        percent: 80
        icon: code-bracket
      - name: English
        description: ''
        percent: 100
        icon: book
      - name: Calculus
        description: ''
        percent: 40
        icon: circle-stack
```

Рис. 3.1: Добавление информации о навыках, об опыте и о достижениях.

Потом я начала писать пост про “Язык разметки Markdown.” (рис. 3.2).

```

2 title: "The Markdown markup language."
3 summary: |
4   Markdown is a lightweight markup language designed for easy readability and
   writing simplicity. Created in 2004 by John Gruber and Aaron Swartz, Markdown
   allows users to format plain text documents in a way that can be easily
   converted to HTML or other structured formats. Its minimal syntax makes it a
   favorite among writers, developers, and content creators who need a fast,
   distraction-free way to produce well-formatted documents.

27 ## Last week
28
29 This past week was full of homework, work, going to the gym and trying out new
recepies. On monday I went to my usual 11AM pilates class, after which I went
to university and had a lot of fun at my English class, where we talked about
health. The following day, I worked all day long and cleaned the house. On
Wednesday I prepared for my two upcpming tests and had fun trying on what
soldiers wear. On Thursday I woke up bright and early and got to university at
8AM to repeat for my upcoming test. At 9AM I had my calculus test, which was
kind of difficult but I was prepared and now I'm waiting for to the results.
After calculc, I had another tst on linear algebra which cofusingly was more
difficult than calculc. One hour and 20 minutes of nonstop writing is kind of
harsh. On this test I do not want to get my hopes up, because I am not so keen
on linear algebra. And today is Friday, I plan on meeting one deadline and
working. Tomorrow I want to do all my homework for the upcoming week and on
Sunday I plan on resting.
30 Despite this week being so full of work and tests, I am grateful to be able to

```

## 4 Выводы

При выполнении данного этапа я добавила больше информации о себя(навыки, опыт и достижения) и сделала пост про языке разметки Markdown.
